Aspiring Full-Stack Developer with internship experience in ASP.NET, SQL Server, and modern web technologies. Passionate about building scalable web applications and AI-powered solutions, with hands-on experience in REST APIs, database design, and full-stack development.

SKILLS

- **Programming Languages:** Python, Java, C#, C, C++, PHP
- **Web Technologies:** HTML, JavaScript, Bootstrap, Tailwind CSS
- **Frameworks & Libraries:** ASP.NET Core, ASP.NET MVC, Web API, Flask, ReactJS, Pandas, NumPy
- **Database:** SQL Server, MySQL, MongoDB, PostgreSQL
- **Tools / Platforms:** Git, GitHub, Postman
- **Core Concepts:** OOP, Data Structures & Algorithms, DBMS, REST APIs, CRUD Operations, SDLC

EDUCATION

- Shree Ramkrishna Institute - Sarvajanik University | Surat, Gujarat
Bachelor of Science - Information Technology | CGPA: **9.09** July 2022 - May 2025
- Smt. Chandaben Mohanbhai Patel Institute - Charusat University | Changa, Anand, Gujarat
Master of Science - Information Technology | CGPA : **7.82** July 2025 - Pursuing
- Ankur Vidhyabhavan | Surat, Gujarat
Higher Secondary (General Stream) | Per: **74.67** June 2020 - April 2022

EXPERIENCE

- *Toshal Infotech Pvt. Ltd.*
Intern - Dotnet Developer November 2024 - May 2025
- **Project Overview:** Built a full-stack Online Food Ordering System supporting 3 user roles with 15+ core features, including menu management, order tracking, and delivery management.
- **Responsibilities:**
 - Designed role-based authentication supporting 3 user roles (Admin, Customer, Delivery Agent).
 - Implemented 20+ CRUD operations using SQL Server for menu, orders, users, and delivery management.
 - Collaborated with a 3-member development team using Git, debugging, and feature implementation.
- **Technologies:** ASP.NET Web Forms | C# | HTML | CSS | JavaScript | Tailwind CSS | SQL Server [GitHub](#)

PROJECTS

- *GreenCoin – Gamified Tree Plantation & Carbon Credit Tracker:* Built a web platform that encourages tree plantation through gamification by tracking plantations, estimating carbon credits, QR-based verification, leaderboards, and reward mechanisms. Integrated map visualization and secure backend operations for real-time plantation management.
Tech Stack: PHP , MySQL , JavaScript , HTML , CSS , Bootstrap , Google Maps API [GitHub](#)
- *RoadRESQ – Emergency Roadside Assistance Platform:* Built a cross-platform roadside assistance application connecting stranded vehicle owners with nearby mechanics. Implemented role-based workflows for customers and mechanics, emergency request handling, service tracking, and responsive mobile interfaces.
Tech Stack: Flutter , Dart , Firebase , Go Router , Git [GitHub](#)
- *PlacementAI – AI-Powered Placement Preparation Platform:* Developing an AI-powered placement preparation platform to help students prepare for technical interviews through resume analysis, personalized learning roadmaps, and recruiter-driven practice modules. A functional prototype has been completed, with AI integration currently in progress.
Tech Stack: React , Python , REST API , FastAPI , Tailwind CSS , MongoDB , Git [GitHub](#)

ACHIEVEMENTS

- Selected for **IIT Roorkee**-Innovation, Design & Entrepreneurship Bootcamp representing Charusat University.
- Presented **RoadRESQ**, an emergency roadside assistance platform, during the **IIT Roorkee-IDE Bootcamp**.
- Team Lead for **GreenCoin** during the **Tech Tonic Hackathon**, developing a sustainability platform.
